

How to install your eBook

You will receive an email containing a link for downloading the e-book.

By clicking on the link an **.epub** file will be downloaded to your device.

To open the (.epub) file you just downloaded, you need to have an eBook reader.

If you own an **iOS** device, you can directly open the .epub file with the built-in eBook reader.

If you own an **Android** device, visit the Google Play store or click [here](#) to select and download a reader.

After installing and opening your eBook reader, locate and add the downloaded .epub file to its library.

In most cases eBook readers, check automatically your device for any downloaded .epub files. You can access the book anytime by opening your eBook reader. The book will be located in your Library.
